

Due to rapidly increasing COVID cases in the immediate surrounding area, out of an abundance of caution, we have decided to close the office this week for all routine eye care so we can do a professionally mediated deep sterilization on top of our regular cleaning practices. It is scheduled for January 12th and 13th.

All of our staff are regularly health tested and as of 1/11/2021, all 3 doctors and 80% of our staff have had their 1st dose of either the Pfizer or Moderna vaccine. We continue to follow all CDC and Pennsylvania protocols.

We sincerely apologize for any inconvenience, but the health and safety of our patients and staff is a priority.

If you have any emergency during this time, please call 610-933-3498 and follow the instructions. Staff will be back in person on January 14th and 15th to handle refills, potential telemed consults, and non-urgent questions. You will be contacted to reschedule your appointment.

Again, we apologize for any disruption!

The Doctors and Staff of Phoenixville Eye Care Specialists
